CICLA – BiclaNet

Connecting the Flow

Master in Creative Computing & Artificial Intelligence
(IADE 2025–26)

January 2026
Milestone 3 - System Demonstration

Introduction

Our role as the Creative Computing and AI team was to design the invisible layer, the system logic that makes different pod designs work as one coherent network.”

“Rather than optimizing one object, we focused on trust, scalability, and real-world uncertainty.”

Agenda

Q&A

Slide 08

BiclaNet

BiclaNet is:

A modular B2B infrastructure platform
That connects **pods, people, and operators**
Through a **shared digital system**

Milestone 3:

From Components

Connected Flow

What we focused on

This milestone focused on connecting the flow:

from physical interaction,
to data,
to intelligence,
to feedback.

What's connected:

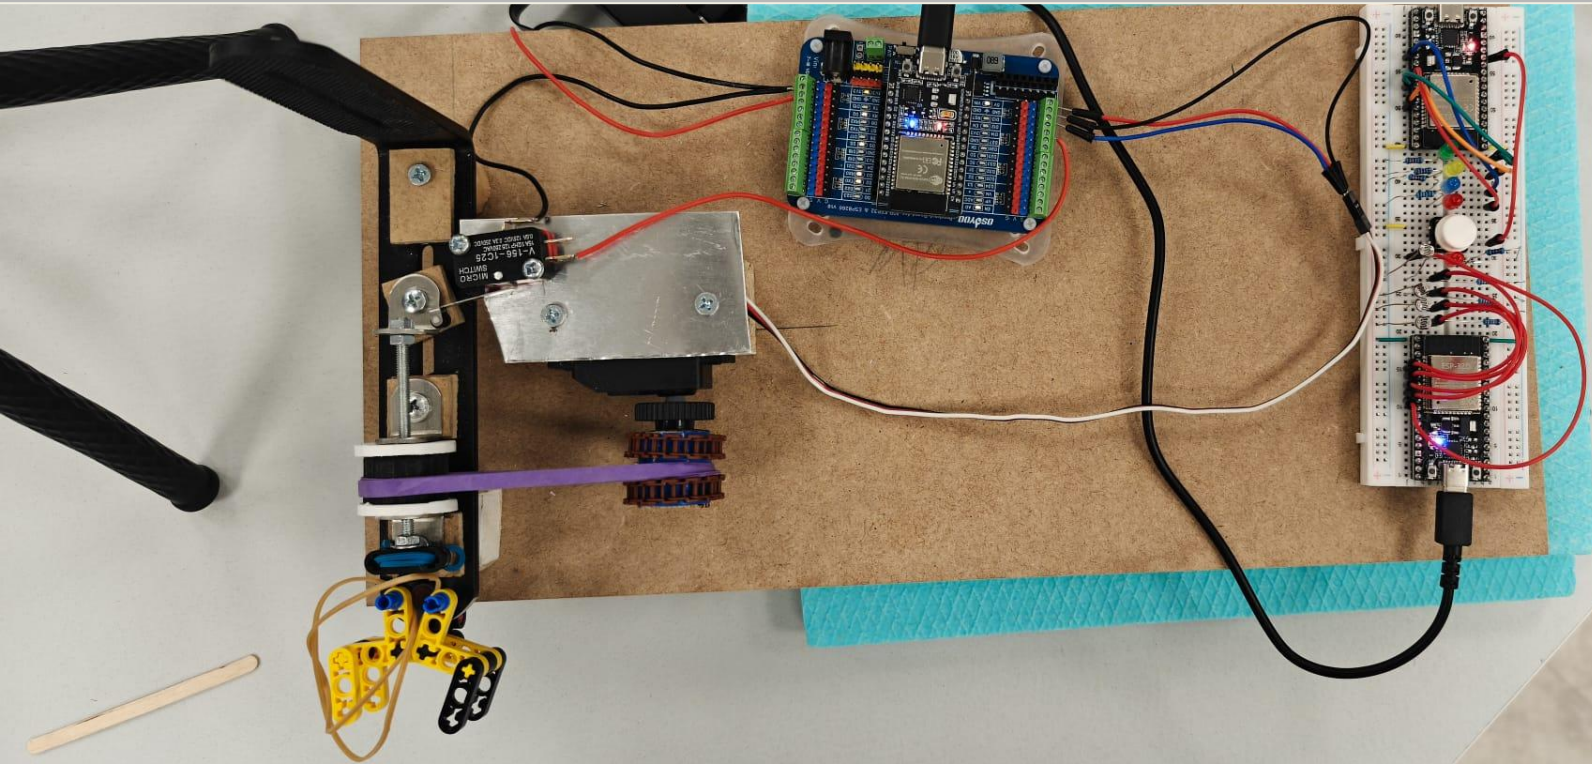

- IoT sensing (real signals)
- Cloud system (shared truth)
- AI logic (interpretation)
- ML prediction (looking ahead)
- Unity simulation (testing before deployment)

Live Demo

This is how we validate behavior *before* it reaches the street.

From Street → System → Interface

Thank you!
